

Gainward PowerPack! Ultra/1760 TV-DVI 128MB

PRODUCT SPECIFICATIONS

● Superior Hardware Design

Gainward's award winning High-Performance/ Wide-Bandwidth™ hardware design powered by NVIDIA's GeForce™ 6600 GPU integrating 128MB/128bits 4.0ns high-speed DDR memory which offers enhanced, leading-edge performance for the 3D enthusiasts.

- 300MHz core clock, 500MHz memory clock.
- High performance Fan Cooling.
- VGA, DVI and TV-out connector.
- Supports two monitors simultaneously, enabled by the NVIDIA nView™ Multi-Display Technology for office applications, 3D gaming and professional applications such as CAD, DTP, animation or video editing. NVIDIA nView™ allows end-users to select any combination of multiple displays, including a digital flat panel (DVI), analogue CRTs, and TV.

CHIPSET SPECIFICATIONS

● NVIDIA GeForce™ 6600

- NVIDIA's CineFX 3.0 engine delivers faster and smoother game play
- NVIDIA's Intellisample 3.0 Technology delivers ultra-realistic visuals, with no jagged edges, at light quality is taken to new height through a new rotated grid sampling pattern.
- UltraShadow II Technology enhances the performance of bleeding-edge games, like id Software's Doom III, that feature complex scenes with multiple light sources and objects. 2nd-generation technology delivers more than 4x the shadow power over the previous generation.
- 128 bits graphics pipeline for uncompromised precision levels without visual artifacts.
- Digital Vibrance Control 3.0 (DVC) allows the user to adjust color controls digitally to compensate for the lighting

BUNDLED ACCESSORIES

- Quick Start Manual (available in English/Chinese/Japanese/French/German/Italian)
- Performance enhanced accelerator driver for Windows XP/2000
- TV-Out cable (HDTV support)

- DVI connector (Optional)

SYSTEM REQUIREMENTS

- Intel Pentium III, AMD Athlon or compatible CPU
- A minimum of 128MB system memory
- CD-ROM drive

GAINWARD
Beyond Your Imagination

Gainward PowerPack! Ultra/1760 TV-DVI 128MB

- Provides world-class **HDTV-out** functionality.
- **Accelerated DVD playback** with enhanced motion compensation in hardware.
- Includes Gainward's award winning **EXPERTool™ tuning utility** for customized performance enhancements and efficient desktop management.
- Performance enhanced, accelerated software drivers for all major operating systems and APIs.
- Easy Plug-and-Play AUTORUN installation from CD-ROM.
- Supports 8x, 4x, and 2x AGP.

conditions of their workspace, in order to achieve accurate, bright color in all conditions.

- **Unified Driver Architecture** (UDA) guarantees forward and backward compatibility with software drivers.
- **Video Mixing Renderer** (VMR) harnesses the power of the 3D graphics engine to empower you to view multiple video windows simultaneously with superior quality, and avoids the problems associated with video overlay.
- **DirectX 9.0 Shader Model 3.0 Support** ensures top-notch compatibility and performance for all DirectX 9 applications, including Shader Model 3.0 titles.
- **PureVideo™** delivers unprecedented picture clarity, smooth video, accurate color and precise image scaling for all video content on any display.

- Requires an AGP compliant motherboard
- Requires an available AGP slot
- Windows XP/2000

API SUPPORT

- DirectX 9.0c in hardware
- OpenGL 2.0 support

OS SUPPORT

- Windows XP/2000
