

Gainward BLISS6800GS PCX 512MB VGA-DVI

PRODUCT SPECIFICATIONS

● Superior Hardware Design

- Gainward's award winning High-Performance/ Wide-Bandwidth™ hardware design powered by NVIDIA's GeForce™ 6800 GS GPU integrating 512MB/256bits high-speed DDR3 memory which offers enhanced, leading-edge performance for the 3D enthusiasts.
- 425MHz core clock, 1000MHz memory clock.
- High performance Fan Cooling.
- NVIDIA SLI™ Technology allowing two graphics cards to be run in parallel to scale up performance.
- VGA, DVI and TV-out connector.
- Supports two monitors simultaneously, enabled by the NVIDIA nView™ Multi-Display Technology for office applications, 3D gaming and professional applications such as CAD, DTP, animation or video editing. NVIDIA nView™ allows end-users to select any combination of multiple displays, including a digital flat panel (DVI),

CHIPSET SPECIFICATIONS

- NVIDIA GeForce™ 6800 GS
- NVIDIA's CineFX 3.0 engine delivers faster and smoother game play
- NVIDIA's Intellisample 3.0 Technology delivers ultra-realistic visuals, with no jagged edges, and light quality is taken to new heights through a new rotated grid sampling pattern.
- UltraShadow II Technology enhances the performance of bleeding-edge games, like id Software's Doom III, that feature complex scenes with multiple light sources and objects. 2nd-generation technology delivers more than 4x the shadow power over the previous generation.
- 256 bits graphics pipeline for uncompromised precision levels without visual artifacts.
- 64-Bit Texture Filtering and Blending Based on the OpenEXR technology from Industrial Light & Magic, NVIDIA's 64-bit texture implementation sets new standards for image clarity and quality through floating point capabilities in shading,

BUNDLED ACCESSORIES

- Quick Start Manual (available in English/French/German/Italian)
- Performance enhanced accelerator driver for Windows XP/2000

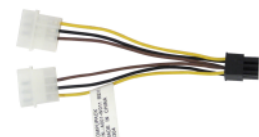

TV-out cable (HDTV support)

DVI connector

HDD Cable

Gainward BLISS6800GS PCX 512MB VGA-DVI

analogue CRTs, and TV.

- Provides world-class **HDTV-out** functionality.
- **Accelerated DVD playback** with enhanced motion compensation in hardware.
- Includes Gainward's award winning **EXPERTool™ tuning utility** for customized performance enhancements and efficient desktop management.
- Performance enhanced, accelerated software drivers for all major operating systems and APIs.
- Easy Plug-and-Play **AUTORUN** installation from CD-ROM.
- **PCI Express** the next-generation bus architecture delivers 2 times data transfers (4GB/s) than AGP 8X.

filtering, texturing, and blending.

- **Digital Vibrance Control 3.0 (DVC)** allows the user to adjust color controls digitally to compensate for the lighting conditions of their workspace, in order to achieve accurate, bright color in all conditions.
- **Unified Driver Architecture (UDA)** guarantees forward and backward compatibility with software drivers.
- **Video Mixing Renderer (VMR)** harnesses the power of the 3D graphics engine to empower you to view multiple video windows simultaneously with superior quality, and avoids the problems associated with video overlay.
- **DirectX 9.0 Shader Model 3.0 Support** ensures top-notch compatibility and performance for all DirectX 9 applications, including Shader Model 3.0 titles.
- **PureVideo™** delivers unprecedented picture clarity, smooth video, accurate color and precise image scaling for all video content on any display.

S/W DVD

Note: Gainward's bundle items are subject to change. Please refer to your local Gainward dealer for more information, or the description in the regional product package

SYSTEM REQUIREMENTS

- Intel Pentium 4, AMD Athlon or compatible CPU
- A minimum of 256MB system memory
- A minimum 400W system power supply, and two unused HDD power connectors available.
- CD-ROM drive
- Requires a PCI Express compliant motherboard
- Requires an available PCI Express slot
- Windows XP/2000/XP 64

API SUPPORT

- DirectX 9.0c in hardware
- OpenGL 2.0 support

OS SUPPORT

- Windows XP/2000/XP 64

BAR CODE

- Large Box : 4718462007593
